**Licensed Clinical Social Worker**

**Professional Interests / Specialties:**

Successful counseling is built on a positive and trusting relationship, much as successful living is dependent on trusting, healthy relationships. I bring a broad array of treatment tools to my work including gestalt, object relations and psychodynamic theories. Most important I bring myself; my heart, my humor, my understanding, knowledge and years of experience. I am especially interested in the dynamics of caring for aged relatives, the experiences of those who were adopted, strengthening the couple relationship and gender related issues.
